

SUMAN M

AI & DATA SCIENCE GRADUATE

Chennai, India | msuman2003711@gmail.com | +91 8637469920 | [LinkedIn: suman-m-b984a8250](#)

SUMMARY

Artificial Intelligence and Data Science graduate with hands-on experience in Machine Learning, Generative AI, NLP, IoT, and data-driven solutions. Experienced in developing AI projects using Python and transformer-based models, with practical exposure to real-world applications. Seeking an AI/ML or Generative AI role to apply technical expertise and deliver impactful solutions.

TECHNICAL SKILLS

- **Programming Languages:** Python, C, Java, SQL
- **Databases & Cloud:** MySQL, SQLite, Firebase, AWS
- **Specialized Skills:** Generative AI, Machine Learning, NLP, Deep Learning, Predictive Modeling, IoT

EDUCATION

B.Tech, Artificial Intelligence & Data Science	Nov 2021 - June 2025
Sri Sairam Institute of Technology, Chennai	
Higher Secondary School	Nov 2020 - July 2021
Sri Sairam Matric Higher Secondary School, Chennai	

CERTIFICATIONS

- Prompt Design in Vertex AI — Google Cloud
- Build Real World AI Applications with Gemini and Imagen — Google Cloud
- Introduction to Generative AI — Google / Coursera
- Python for Data Science — NPTEL

INTERSHIPS

Artificial Intelligence Intern — Infosys	July 2025 – July 2026
• AI Project Development: Worked on real-world AI projects involving Machine Learning, Generative AI, NLP, and transformer-based models using Python. • AI Applications: Contributed to feedback and PDF summarization solutions using transformer-based models and LLMs to generate concise, meaningful summaries.	
Python Developer Intern — Infotact Solutions	Jan 2025 – Feb 2025
• Python Application Development: Developed Python-based applications using Tkinter, SQLite, APIs, and data visualization libraries, focusing on practical software solutions. • Machine Learning Project: Built a voice-based attendance system using audio processing, MFCC feature extraction, and machine learning techniques for speaker recognition.	

PROJECTS

Feedback Summarization using Transformer-Based Models
• Developed an AI-based solution to analyze large volumes of feedback and generate concise, meaningful summaries using transformer-based NLP models. • Applied text preprocessing and summarization techniques to improve the efficiency of feedback analysis. • Evaluated generated summaries for relevance and clarity to improve feedback analysis.
Smart Sewage Monitoring System — IoT & Machine Learning
• Developed a real-time sewage monitoring system using NodeMCU, ultrasonic sensors, Firebase, and Streamlit, with an interactive dashboard and Telegram API alerts for critical levels. • Implemented a Random Forest model using historical sewage-level data to identify patterns and predict areas/times with higher overflow risk.

ADDITIONAL INFORMATION

- **Languages:** English, Tamil, Hindi
